Bolster is on a mission to make the internet a safer place by eradicating threats from your online experience. We deliver phishing and scam protection for companies fo all sizes by automating the detection and takedown process through generative AI. Attackers are leveraging different channels to impersonate organizations and individuals as well as launch their online attacks. Because we think everyone deserves a safe internet experience, we also created CheckPhish, a community tool to help anyone discover and monitor sites for phishing or scam activities.

Backed by leading investors like M12, Thomvest, Cervin, and Crosslink, and founded by threat research leaders, many of the world's leading brands over 20% of Fortune 500 rely on Bolster and CheckPhish today.
